DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Drawings

- a. The drawings are objected to because in Fig. 5, "⊗" led by reference numeral 420 should be --Θ--. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

- b. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "demodulator ...

base band signal” and “an error compensator ... for channel decoding” claimed in claim 36 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

c. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Art Unit: 2622

d. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: “demodulator ... base band signal” and “an error compensator ... for channel decoding” claimed in claim 36 are not described in detailed description of the specification.

Claim Objections

e. Claims 16, 19, 21, 36 and 37 are objected to because of the following informalities:

In claim 16 lines 15 and 23, claim 19 line 1 and claim 21, line 13, “third” should be --second-- since there are no three FFT units in the claim. Appropriate correction is required.

In claim 36 lines 16 and 17 and claim 37 lines 4, 22 and 23, after “received”, --base band-- should be inserted.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 2622

2. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to how or fairly suggest a channel equalizer for restoring an original signal from a digital television received signal that past through a channel having the combinations as claimed, including a channel estimator, a channel distortion compensator for converting the received signal and the estimated impulse response of the transmission channel into frequency domain signals, setting a reciprocal of the estimated impulse response of the transmission channel in a frequency domain as an initial coefficient, receiving a channel equalized signal fed back in a data duration, calculating the error between equalized signal and decision value of the same equalized signal, updating the coefficients by using the error between equalized signal and decision value of the same equalized signal continuously, compensating distortion of the received signal converted into the frequency domain, and converting the compensated received signal back into a time domain, and a noise canceller, as recited in the claims.
